## ATMs

SEICO recognizes the need for dependable, trustworthy, and secure ATM machines for your financial institution. Your customer needs a user-friendly machine, while you require the peace of mind that your ATM and its assets remain safely secured.

We carry **Nautilus Hyosung ATMs** and offer additional anti-skimming devices to help protect customers and prevent fraudulent activity. Nautilus Hyosung is a leading provider of ATM technology and solutions. The company's vertical integration development model and customer-centric philosophy delivers peak performance, high reliability, and an overall enhanced value for your financial institution.

## SEICO SECURES ATMs

With intrusion and hold-up systems, SEICO can protect the carriers, equipment, and other critical components of your financial institution's ATM machines. All potential areas of fraud, to include card skimming, are secured through our unique method of applying these advanced technologies to fit your institution's specific needs. It's important to be one step ahead and we can help keep you there.

## Superior Audio/Video Systems

From modern, lightweight wireless headsets to multi-lane audio and video control systems, we ensure the clearest possible voice and visual communications with customers. Marketing and advertising messages can also be implemented, utilizing the two-way video at the drive-up.

## Upgrade Your Drive-up System

SEICO does it all from installing a completely new system or providing service for an existing drive-up system to custom interfacing

advanced drive-up audio system wireless headset technology.

Need a system upgrade? **Hamilton Safe** has combined the best features of two successful drive-up systems in a new model: the HA1000-XLR. Optimized for use in banking, pharmaceutical, and retail applications, this stainless steel system integrates improved functionality and dual user input locations in a sleek and weather-resistant exterior.

From pneumatic tubes to deal drawers and windows, we provide industry standard systems with outstanding performance and reliability.

# ONE SOURCE FOR BANKING EQUIPMENT & SECURITY

## Hyper-Secure Night Depository Equipment

Walk-up or drive-up Hamilton depositories are mechanical, not electric, so service is virtually eliminated. We provide many options for night depository equipment, including **Depository Access Control Systems** that provide an extra layer of security and an audit trail for your commercial deposits. These advanced night depositories with access control security help eliminate fraudulent activity by recording video of the person making the deposit, and the deposit bag entering the safe, and even recording the time of deposit.

## Safe Deposit Boxes — Second to None

Our entire safe deposit box lineup is made in American factories. We also drill out locks for replacement, making it easier to prepare the box for another renter. Give your clients round-the-clock access to their box contents resulting in a better, more convenient service to reduce the costs

associated with traditional SDBs through **SafeStore Auto**—an automated self-service system for safe deposit boxes.

## One Source for Safes & Vaults

SEICO offers modular custom or standard UL fire-rated safes and teller receivers for any configuration. Complete interiors are available including cash lockers, teller drawer storage, and night depositories. Custom colors are available at no extra charge. And thanks to Hamilton security, our safes are designed to meet even the highest security standards. Plus, all safe & vault equipment is customizable to maximize your space!

## Undercounter Cabinetry & Germ Shields

**FENCO** and **KORDEN** are customer favorites when it comes to durable, well-made teller line undercounter cabinetry for banks. A wide range of cabinet colors are available or we can match your own custom color scheme. If your undercounter system needs new accessories, ask us about which FENCO products could easily be integrated. **FENCO has recently introduced a durable line of germ shields for bank lobbies and offices.**

### **Security Systems: Get the Whole Package for Your Facilities**

SEICO brings to the table more than 200 years of accumulated experience in the related fields of installation and maintenance of integrated security systems. A family-owned company that provides services throughout Illinois, Iowa, Missouri, Indiana, Wisconsin and beyond, SEICO provides high-quality security systems without losing the ability to customize solutions to fit customer specification and facility challenges. We provide free engineering, design, consultation and specifications services through our sales, engineering and project management staff.

SEICO Security is trusted by banks and credit unions to deliver security, surveillance, and peace of mind. Since 1972, we've been providing security systems, access control systems, video surveillance, photo ID, burglar/fire alarm systems, and alarm monitoring as an integrated solution to our banking equipment. Every system we provide is custom designed and engineered to meet your individual security challenges, regardless of the size of your organization.
