

The Finest Name in Security

Your One Source for **ALL** Your

ATM SECURITY

We secure ATMs with intrusion and hold-up systems to protect the carriers and your ATM assets, plus digital video systems to provide a prosecutable record of all transactions.

AUDIO/VIDEO SYSTEMS

Drive-up and walk-up audio systems are in stock, as well as all the parts needed to make repairs to your system. From modern, lightweight wireless headsets to multi-lane audio and video control systems, we ensure the clearest possible voice and visual communications with customers. We can custom interface wireless headsets with your drive-up audio system for the busy, weekend drive-up tellers to hear the customer and not the ambient background noise. Marketing and advertising messages can also be implemented, utilizing the two-way video at the drive-up.

DRIVE-UP SYSTEMS

We have it all. From installing a completely new drive-up system to providing service and / or retrofit any existing overhead or underground drive-up system. From pneumatic tubes to deal drawers and windows, we provide industry standard systems with outstanding performance and reliability.

Financial Security Needs

NIGHT DEPOSITORIES

Walk-up or drive-up Hamilton depositories are mechanical, not electric, so service is virtually eliminated.

SAFE DEPOSIT BOXES

Every lock manufacturer is represented in our product line. We also drill locks without destroying the door, and put a new lock in its place, leaving your box ready to rent again immediately.

SAFES & VAULTS

Custom or standard UL rated safes and teller receivers (mule). Full interiors available including cash lockers, teller drawer storage and night depositories. Custom colors are available at no extra charge. For your new facility, a modular pre-formed Hamilton vault saves money in installation costs and is UL rated. SEICO can provide safe deposit boxes and lockers, in any configuration, for your vault, customizing each vault to maximize space. We also provide Schwab record vault doors and file cabinets, UL fire-rated, to protect your valuable records.

UNDERCOUNTER CABINETRY

FENCO and KORDEN are our favorites when it comes to durable, well-made teller line undercounter cabinetry. Accuride® glides are utilized, which have a lifetime warranty. A wide range of cabinet colors are available, or we can match your own custom color scheme.

ilding, we make it a bank.

Experience Counts

Protecting and Servicing Illinois Since 1972

SEICO is your **complete** source for all your security needs. Whether it's a drive-up system, vault door, audio system, digital video system, burglary / temperature / fire alarm or just alarm monitoring, we have the right product to meet your needs, at an affordable price. From drilling safe deposit locks to installing modular vaults, no job is too small or too large for us to handle. SEICO has been protecting and servicing Illinois' financial, industrial and commercial businesses since 1972.

Every system we provide is **custom** designed and engineered to meet your individual security needs, regardless of the size of your business, at a reasonable price. We provide **free** engineering, design, consultation and specifications services through our sales, engineering and project management staff.

Our experienced technicians provide service on every system we sell, plus service on most other manufacturer's products and systems. And, our service department provides free loaner equipment, so that your systems are 100% . . . **100% of the time.**

When you use SEICO, you are hiring a company that stands behind every product, providing you with peace-of-mind turnkey installations. Call SEICO today at **(800) 272-0316** and let us get started designing a system to meet the security needs of your business.
