

EDUCATION SYSTEMS

REDEFINING
SECURITY

The security of students, faculty and staff is a high priority. It takes dedicated people to develop the young minds of future leaders... a team of parents, teachers, coaches, mentors, and administrators all working towards the same goal—preparing the next generation to make our world a better place. Today, keeping them safe is just as important as providing that nurturing space for students to learn and grow. SEICO™ Security wants to be a part of that team.

Comprehensive Access Control

SEICO offers complete visitor management and access control systems — keyless entry systems, remote door release, security cards, scheduled lock down, emergency lock down, access reports and photo ID integration. Along with badge printers and badge accessories — lanyards, badge reels, badge holders and more.

Photo ID Systems/Video Badging

With comprehensive photo badging systems and accessories, you know exactly who and what enters your property. SEICO has everything you need, including Asure ID® and EPI™ Suite Photo ID and ID Card Application Control Software as well as Video Badging Systems.

Digital Surveillance

Stay secure with digital surveillance. SEICO offers surveillance system design, installation and support with all major brands of CCTV digital video surveillance systems — including March® Networks, Pelco®, Arecont Vision® and Axis® Communications.

- **Cameras — standard, IP, megapixel, dome, pan, tilt, zoom, day / night and wide dynamic range cameras**

- **LCD displays**

- **Digital video recorders**

Alarm Systems

What mix of alarms are right for your school system? Alarms help prevent burglary, theft, fire, unauthorized entry and more. As an educational institution, it's important to ensure the safety and security of your students, faculty, staff and facilities. SEICO provides security consulting, design, installation, training and monitoring solutions to give you the highest level of protection. SEICO integrated security alarm systems offer effective security for today's challenges with one interface that controls multiple functions. Integrated security systems simplify operations by multitasking and maintaining high security automatically while requiring less training to achieve optimum results.

- **UL listed**
 - **fire, burglary, panic**
- **Multiple zones of protection**
- **Wireless devices**
 - **burglary, panic**
- **Virtual Keypad app for ease of control.**

Upgrade Your Visitor Entry

Keeping students, faculty and staff safe starts at the main entrance. One of the most innovative products we recommend is the Hamilton™ School Entrance Control Vestibule. This state-of-the-art system works to protect from threats that could disrupt a safe learning environment. This tough first line of defense prevents firearms and other weapons from entering a school, university or other educational facility.

INTEGRATED SOLUTIONS TO MEET TODAY'S EDUCATION SECURITY CHALLENGES

Hamilton™ School Entrance Control Vestibule features:

- **Metal detection, motion sensors, door locking**
- **Controls and warning alerts to prevent unauthorized access**
- **Locks person posing the threat into the vestibule if weapon detected**
- **Stainless steel construction**
- **Bullet-resistive glass**
- **Multi-functional operator console**
- **ADA compliant**
- **Designed by the Homeland Security Act**
- **CEIA Walk-Through Metal Detection**
- **Options:**
 - **Windows-based tablet for wireless communications control**
 - **Two-way audio/one-way video for attendants to see inside vestibule**

Smart Classrooms

SEICO smart classrooms offer integrated system design that can include projectors, screens, audio

and smart boards. Innovative products such as the Mondopad Core™ enhance higher education learning. The Mondopad interactive touchpad makes it easy to learn, grow and collaborate in the classroom by allowing students to search the web, use a digital whiteboard and share information wirelessly at the touch of a button.

Intercom and Paging

SEICO can meet your needs for any type of classroom intercom and paging system, from basic classroom intercoms to comprehensive facility paging and PA messaging. SEICO helps protect your schools with Aiphone™ proactive security video solutions for entry and access control, internal communication, paging and alert notifications, bell scheduling, emergency towers, and call boxes. Empower your campus security team by providing tools to monitor and communicate quickly across the buildings, campuses and even districts!

Audio/Visual Capabilities

SEICO works closely with architects, designers, facility managers and both IT and construction professionals to design, build and install audio/visual systems. From stadiums, auditoriums and arenas to classrooms and boardrooms, SEICO can design, install and maintain audio/visual systems to meet your institution's needs.

- **Audio/visual classroom/smart board integration**
- **Outdoor auditorium sound**
- **Conference room design**
- **Videoconferencing AV equipment**
- **AV control systems**

Comprehensive & Reliable Service

Our experienced technicians provide reliable service on every system we sell, along with many other manufacturers' products and systems. We strive to provide quality service that will ensure your electronic systems are in optimal working order, 24/7/365. We can respond within the hour and we have loaner equipment available so all your systems are always running at 100%. Keeping your equipment in top working order is very important to us.

Security Systems: Trusted, Integrated Solutions for Your Educational Institution

SEICO offers more than 200 years of experience in the design, installation and maintenance of integrated security systems, fire alarm systems and audio/visual systems. With a highly trained and certified team of security professionals, SEICO stands ready with cutting edge and cost-efficient system integration to fit perfectly throughout the facilities of your educational institution. A family-owned company that provides services throughout Illinois, Iowa, Missouri, Indiana, Wisconsin and beyond, SEICO provides high-quality systems without losing the ability to customize solutions to fit customer specifications and facility challenges. We provide free engineering, design, consultation and specifications services through our sales, engineering and project management staff.

SEICO Security is trusted by educational institutions to deliver security, surveillance, and peace of mind. Since 1972, we have provided access control/keyless entry systems, alarm systems, digital surveillance, visitor entry, photo ID systems/video badging, smart classrooms, intercom and paging, and audio/visual as integrated solutions to educational institutions. Every security system we provide is custom designed and engineered to meet your individual security needs, regardless of the size and scope of your school system.
