SECURITY**

SEICO offers design, installation, monitoring and service on stand-alone or integrated systems that work seamlessly with intrusion and access control systems for exceptional ease of operation and protection. Throughout the Midwest, we design and install security systems, fire alarm systems and audio/visual systems backed by service you can trust. Our systems are designed for and installed in businesses, schools, jails and other organizations. For multi-unit sites, we enable users to check the status of integrated fire, security and access control systems from any computer with Internet access (System Link™ software required).

## SEICO™ SECURITY SYSTEMS

The security of people is a high priority. Today, keeping them safe is just as challenging and important as a well-run business.

SEICO offers Complete Visitor Management and Access Control Systems, from keyless entry systems to remote door release, security cards, scheduled lock down, emergency lock down, access reports and photo ID integration, along with badge printers and badge accessories — lanyards, badge reels, badge holders and more. All this plus the convenience of our virtual keypad smartphone application to control and monitor from anywhere!

## Photo ID Systems

With Comprehensive Photo Badging Systems & Accessories, you know exactly who and what enters your property. SEICO has everything you need, including Asure ID® and EPI™ Suite Photo ID and ID Card Application Control Software as well as Video Badging Systems.

## Burglar Alarm Systems

It's important to ensure the safety and security of your people and facilities. SEICO provides security consulting, design, installation, training and monitoring solutions to give you the highest level of protection.

- **UL listed – fire, burglary, panic**
- **Cellular connectivity — ethernet, keypad, hybrid**
- **Commercial, residential and industrial**
- **Wireless systems**
- **Security center software — secure, interactive reports online**
- **Virtual Keypad app control**

## HD Video Surveillance

SEICO offers HD Video Surveillance by Exacq Technologies Inc., leading manufacturer of video management system (VMS) software and servers. This easy-to-use software is compatible with factory-installed hybrid and IP camera servers, commercial off-the-shelf servers and can be directly installed on approved IP cameras. The ExacqVision Professional Video Management System allows you to monitor video, audio and data in real time. Bookmark important videos to easily view later! It has powerful search capabilities and requires little to no training.

# SEICO SOLUTIONS

## ENSURE SAFETY & PROTECT ASSETS

### Fire Alarm Systems

Ensure life safety with features such as:

- **Stimulating two senses with acoustic and optical alarm signals**
- **Accelerating evacuation procedures by providing voice messages in a wide range of pre-defined languages**
- **Voice evacuations systems**
- **Keeping sounders and beacons functional in case of a short circuit or system failure thanks to integrated loop isolators and degrade mode**

One of our popular systems is the IPA-100, an analog/addressable releasing fire alarm system with a total system capacity of 127 addresses. Additional capacity is achieved using multi-point SLC modules. The control panel utilizes the exclusive Potter protocol that includes a complete line of sensors and modules.

At SEICO, we can set up **Annual, Semiannual or Quarterly Inspections** for all brands of Fire Alarm Systems. Our professional inspection team will test and inspect your systems components for proper operation. All of our inspection services are performed in accordance with the National Fire Protection Act (NFPA72). We inspect and service all major brands of fire alarm systems. SEICO oversees all activity associated with fire pumps, smoke detectors, overhead sprinklers and other fire alarm system components. With our fire alarm system monitoring, you'll get constant oversight and immediate response to alarms. Police and firefighters can instantly be notified so action can be taken.

### Audio/Visual Systems

SEICO works closely with architects, designers, facility managers and both IT and construction professionals to design, build and install audio/visual systems.

### SEICO Video Doorbell & Virtual Keypad™ App

Video Doorbell by DMP® lets you see, hear and speak to anyone at entrance doors from anywhere using the Virtual Keypad™ App, which gives Apple® iPhone/iPad and Android™ users access to a number of security system keypad functions remotely via cellular/network connection. Remotely control lights, thermostats, door locks, appliances, cameras, garage doors and more via an easy-to-use interface. Standard features include arming/disarming, checking status, area arming and output control, as well as Z-Wave® capabilities. If motion is detected or doorbell pressed you'll promptly receive a notification.

### Intercom & Paging Systems

Intercom and paging systems provide convenient communication for your facility. SEICO can meet your needs

for any type of intercom and paging system, from basic intercoms to comprehensive facility paging and PA messaging. SEICO helps protect your facility with Aiphone™ proactive security video solutions for entry and access control. Employees and customers expect safety and security. Maximize productivity by protecting your assets. Solutions for business environments, multi-tenant properties and across campuses.

Video intercoms are an efficient security measure that reduce the risk of random violence and theft.

### SEICO Comprehensive & Reliable Service

SEICO designs, installs and services your security systems to maximize protection over your people and assets. We also provide security system integration and monitoring for comprehensive intrusion and risk protection.

Our experienced technicians provide reliable service on every system we sell, along with many other manufacturers' products and systems. We strive to provide quality service that will ensure your electronic systems are in optimal working order, 24/7/365. We can respond within the hour and we have loaner equipment available so all your systems are always running at 100%.

## **Security Systems: Trusted, Integrated Solutions**

SEICO offers more than 200 years of experience in the design, installation and maintenance of integrated security systems, fire alarm systems and audio/visual systems. With a highly trained and certified team of security professionals, SEICO stands ready with cutting edge and cost-efficient system integration to fit perfectly throughout all types of buildings. A family-owned company that provides services throughout Illinois, Iowa, Missouri, Indiana, Wisconsin and beyond, SEICO provides high-quality systems without losing the ability to customize solutions to fit customer specifications and facility challenges. We provide free engineering, design, consultation and specifications services through our sales, engineering and project management staff.

SEICO Security is trusted by businesses, institutions and residential customers to deliver security, surveillance, and peace of mind. Since 1972, we have provided access control/keyless entry systems, alarm systems, digital surveillance, visitor entry, photo ID systems/video badging, smart classrooms, intercom and paging, and audio/visual as integrated solutions for all types of businesses, organizations, institutions and residences. Every security system we provide is custom designed and engineered to meet your specific security needs, regardless of the size and scope of your facility or residence.
